

HOW TO GENERATE WCL BARCODES

Here are the instructions on “How to add barcode to your Master / Shipping cartons.”

We are implementing this requirement to update our inventory management for better tracking and faster processing of all our customers cargo. As of December 1st, 2018, we have implemented a barcode system to improve our tracking system. The barcode must be placed on 2 sides of the master carton by your manufacturer overseas during production. **Any cargo entering our warehouse without a barcode will be billed an additional fee \$0.70/label (minimum \$150).**

* The barcode number should match the packing list. Please use the link below as reference:

<https://www.worldcraftlogistics.com/download/DetailedPackingList.xls>

Steps to be completed:

- 1) All Master cartons must be barcoded on **2 sides**
- 2) Please click the weblink:
<https://www.barcodesinc.com/generator/index.php>
- 3) Example of the barcode: **WC + Your FNSKU or UPC**
***Make sure to add “WC” and do not just add your FNSKU# or UPS number on the master carton only
By adding WC, Amazon or other company cannot scan this barcode but if we look at the end of the code, we can confirm what is inside***
- 4) Click “Advanced Options”
- 5) Check “Draw value text”
- 6) Check “S t r e t c h text”
- 7) Height: 100
- 8) Bar width: 2 pixels
- 9) Font: Abc123 or the largest front
- 10) Symbology: Code 128-b
- 11) Output: PNG
- 12) Hit the word “Generate Barcode” to get your label
- 13) Save the image and give it to your supplier to place it under your carton markings “Made in China”

Example: WCW059T05R7F

W C W 0 5 9 T 0 5 R 7 F
